

XL Series Camera

For Extreme Locations

SWPRO3x Solar Camera Kits

Twice the Solar - Double the Battery Backup

Sensera Systems was built on innovative solar power technology and our jobsite cameras are designed to withstand the toughest conditions — from the wilds of Alaska to downtown Manhattan.

Sensera's XL series of solar-powered cameras are ideal for projects in locations with limited sunlight, adverse weather, or long cycles of shade from canyons or neighboring buildings in urban settings. These cameras provide extended 10 day battery backup for ultra remote and extreme jobsite progress monitoring, collaboration, safety and security.

FEATURES & BENEFITS

- 2x the Solar 2x the Battery Backup
- Up to 10 Day's of Power
- Two 35 Watt Solar Panels
- Extended, Integrated Battery Backup
